

# Eldorado 10

**Eldorado 10 alfalfa variety offers excellent yield and stand persistence. This variety is well suited for hot climates and has high resistance to aphids.**

## Agronomic Traits

- Persistent
- Quick recovery after cutting
- Well suited for hot climates
- Fall Dormancy: 10

## Key Advantages

- High tonnage forage production
- Consistent yields across cuttings, including hot summer months
- Rapid re-growth after cutting
- Highly suited for haylage or hay production
- Good overall resistance to aphids and stem nematode
- Strong yield ability in the low desert
- Well-suited to hot summer alfalfa production areas of Mexico, Southern San Joaquin Valley, Imperial Valley and Arizona
- Well-suited to alfalfa production in north Africa, Saudi Arabia, and similar climates around the world
- Competes well with Bermuda grass when soil potassium levels are maintained for alfalfa according to soil test recommendations
