

SW9215RRS

SW9215RRS with Roundup Ready® Alfalfa Technology is excellent for forage production in FD9 regions. It tolerates saline soil and has exceptional stand persistence.

Agronomic Traits

- Excellent field appearance, stand longevity and adaptation to many environments
- Dormancy 9 with outstanding yields in areas irrigated with EC15 water
- Resistant to root rot fungi that are present in California soils

Key Advantages

- Excellent choice for forage production
- Tolerates saline soil
- Exceptional stand persistence
- Originally developed from SW9215 to allow use of the Roundup® herbicide
- A population improvement for yield and performance
- Maintains the excellent performance of SW9215 plus outstanding salt tolerance
