

FD4 Alfalfa | High Yielding | Excellent Disease Resistance

# SW4306

**SW4306 is a FD4 variety with strong yield potential. This alfalfa variety has good overall disease resistance with high resistance to stem nematode for the northwest.**

## Agronomic Traits

- DRI Score: 35/35
- Fall Dormancy: 4
- Yield: 9
- Winter Hardiness: Very Hardy

## Key Advantages

- New variety with consistent high placement in yield trials
- Unique germplasm base selected from broadly adapted parent lines
- Highly resistant to seven major alfalfa pests and diseases
- Strong Phytophthora root rot resistance makes SW4306 suitable for fields with variable drainage
- Highly resistant to spotted aphid and resistant to pea aphids
- Diverse germplasm base makes this variety a strong choice for diversifying your alfalfa production.

PEST RESISTANCE	HR	R	MR	LR
Bacterial Wilt	•			
Verticillium Wilt	•			
Fusarium Wilt	•
